HPM Mini Powerpacks

**HYDRA
PRODUCTS**

Engine Driven Hydraulic Power Units

Based on our HPM Mini Power Pack range, this self contained HPM uses a petrol engine to drive a gear pump.

Flow rates up to 12LPM and pressures to 250bar.

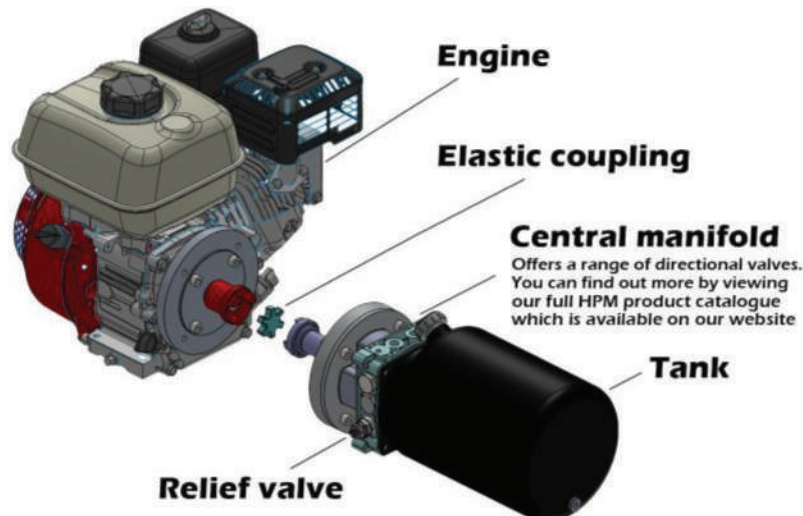

Recoil start Honda or Loncin engines drive a hydraulic gear pump via a noise reducing elastic coupling.

Central valve manifold offers a pressure relief valve as well as the flexibility to house directional valves.

Engines	Power (HP)	Ordering code
Honda GX200	6.5	H
Loncin	6.5	L

Pumps	Ordering code
2.5 cc/rev	25B
3.2 cc/rev	32B
4.0 cc/rev	40B

Tanks	Ordering code
5 Litre Steel	05S
5 Litre Plastic	05P
10 Litre Steel	10S
15 Litre Steel	15S
